Weekly Report 11 due April 1, 2014

This week I fixed some hardware bugs. I had one note that was not playing because the solenoid did not go down far enough. I used some wood glue to make the solenoid longer and it was able to produce sound comparable to the other notes. I also had a note that was not playing because of an electrical problem. After resoldering a part of my circuit board I was able to get it to work as well. My next steps will be fixing some software bugs and improving my robot's appearance.
