Intelligent Machines Design Laboratory

Weekly Report 5 due February 11, 2014

This week I did additional platform, electrical, and software work. I added the connections for the IR sensor and for interfacing with the Arduino to my circuit board and added some additional software to prepare for my systems test. I designed my platform with Andy's help and got it cut out on the T-Tech. I also purchased some additional supplies for the platform. This week I hope to assemble the platform along with the rest of the system for my systems test.
