

Graving Services

Before

Gold Coast Meats offers an alternative holistic source for control of unwanted weeds, grasses, and other vegetation that may detract from the growth of vineyards and overall look of landscapes.

By hiring our sheep you eliminate the need for using harsh chemicals or expensive mowers which safens your environment while improving soil quality and reduces erosion. Target unwanted grasses, weeds, mustard, and help get rid of spurs and suckers during dormancy. Our grazing services benefit soil quality, water process and runoff, environmental restoration, and helps broaden community dynamics.

and food!*

About Us

Gold Coast Meats is a product of Cal Poly alumni with a responsible farming philosophy. Not only do we strive to produce the best quality product available, but work hard to improve the quality of land and pasture that we graze. We strongly believe that the decisions we make affect the land, animals, and people around us. This is why we take the time to respect the environment and land that we use.

Our sustainable practices ensure the quality of our land and animals. Our lambs benefit from our low stress handling and herding techniques, as well as, the natural grasses and legumes they eat. Our lamb is processed at a USDA inspected facility and delivered right to you, the customer. We pride ourselves in customer service and the quality of our product.

Products

Vineyard Grazers: Use electric fence, dogs, and rotational grazing plans to effectively control forages during vine dormancy.

Landscapers: Use electric fence and dogs to graze and clean private property of brush.

Processed Lamb: Whole or half lambs for special events and dinners.
