Intelligent Machines Design Laboratory

Weekly Report 1

I ordered and received my board on Tuesday from Thomas and Mike. Currently no functional work has been done with the board because I do not have a programmer. I ordered my programmer last week and it appears, according to USPS, it was received at my residence 1/15/08. This gives me more than enough time to get my board up and running (which is about 5 days). According to Thomas my board has been verified to be programmed correctly and run code properly. This will be verified this weekend when I get my board functional.
