Weekly Report

Date: 1/24/08
Student Name: Jeff Lettman
TA : Mike Pridgen
Adam Barnett
Instructors: Dr. A. Antonio Arroyo
Dr. Eric M. Schwartz

University of Florida
Department of Electrical and Computer Engineering
EEL 5666
Intelligent Machines Design Laboratory
Weekly Report 2

This week I decided on a concept for my robot design. I proposed an autonomous construction platform capable of securing walls at a construction project. During this past week I tested the AVR microcontroller board I received from Atmel. The blinking LED light confirmed the working status of my board after the short introductory program was downloaded. The base or shell of my future website has also been put up on my plaza space, http://plaza.ufl.edu/jlettman. The pages and frames are all in place awaiting actual information and pictures to begin filling it out.
