

Assignment 8 - spatial analyst

Prepare a process flow chart - similar in concept to the one prepared for class exercise 8b in the last slide of lecture 8 - for the Spatial Analyst demo-exercise that we conducted in class. The flow chart should reflect the concepts, the steps, and the functions used in the Spatial Analyst exercise in a concise manner.

You can prepare it either by hand or by computer tools, but at the end submit it in digital format.

Home assignments always due a week later.
