

# URBAN AND RURAL POVERTY

Alex Atwood

Chris Guzman

Thomas Felsmaier

Tim Corsino

# Urban Lifestyle

- Private services are plentiful
- More opportunities for the poor
- Easy access to points within the city (parks, after school programs, jobs, etc.)
- Distance to education
  
- Lack of security
- High cost of living

# Rural Lifestyle

- Cost of living not as expensive
- Removed from activity and community involvement
- No nearby infrastructure or transportation
- Not as many services compared to the urban context
- Low land values
- Distance to education

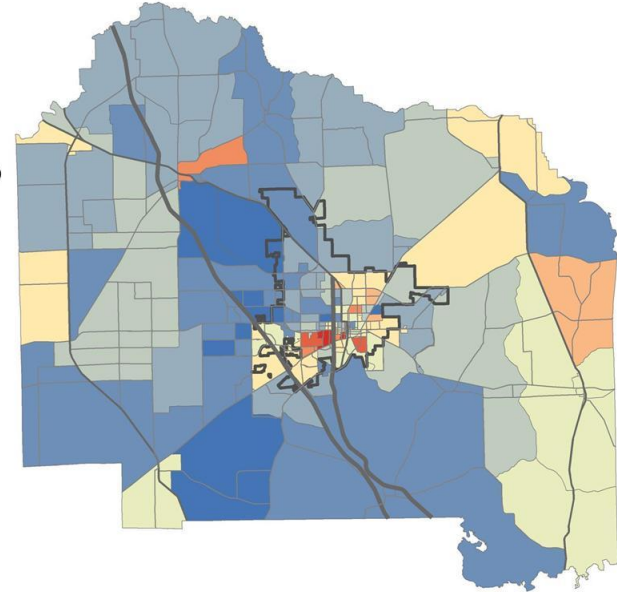

# Income Levels

Income < \$10,000

Income \$10,000 to \$14,999

Income \$15,000 to \$19,999

Income \$20,000 to \$24,999

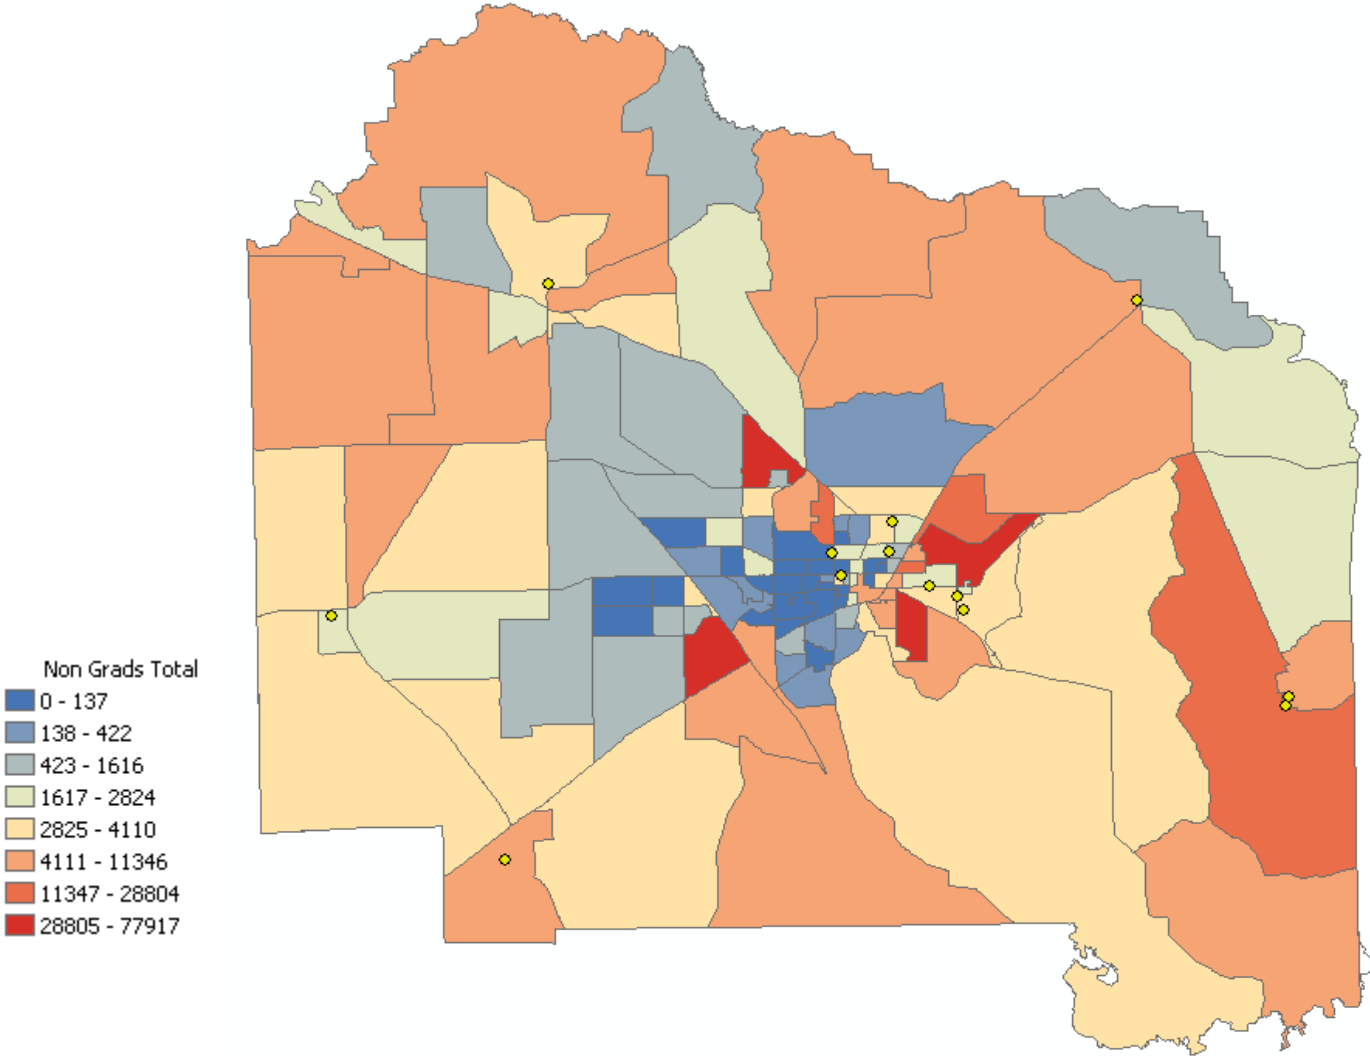

# U.S. Percent Poor

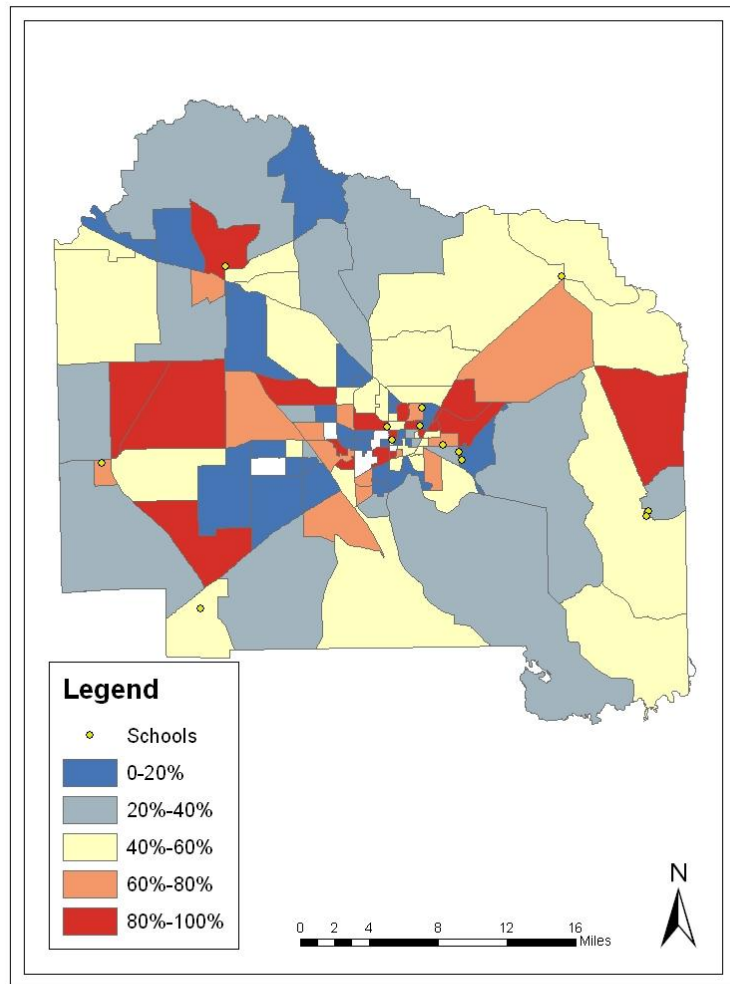

## 2002 Poverty Rates

Source: <http://www.ers.usda.gov/publications/rdr100/rdr100.pdf>

# Where are the Non Grads?

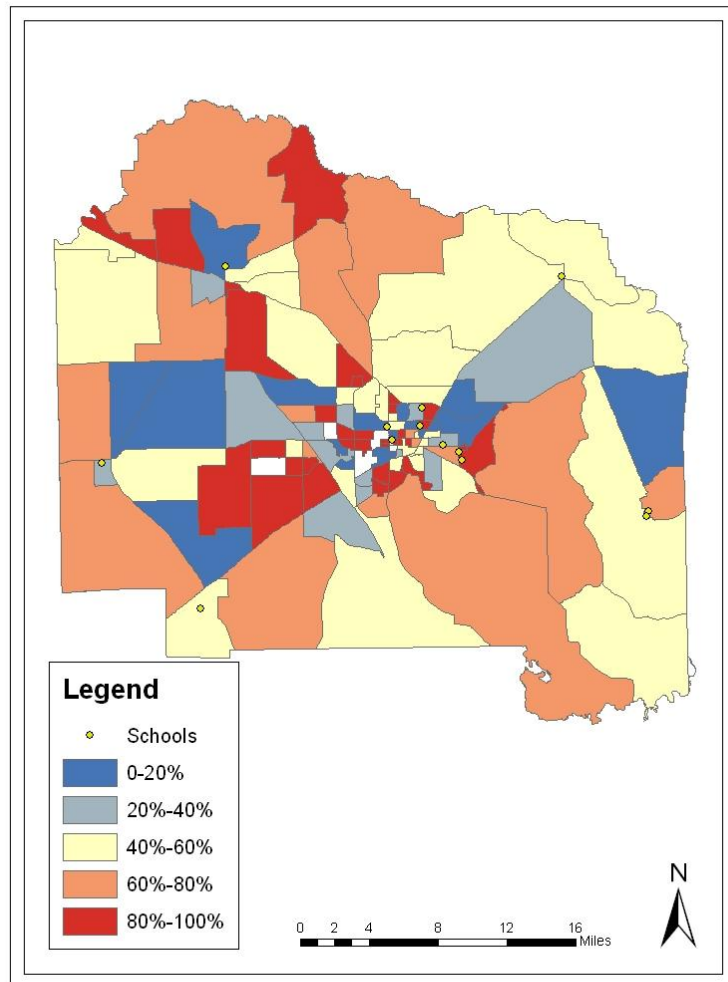

# Males Without High School Diploma

- Males without a high school degree are fairly spread out.
- Rural and city schools have at least one adjacent block group with 60% or more without diploma.

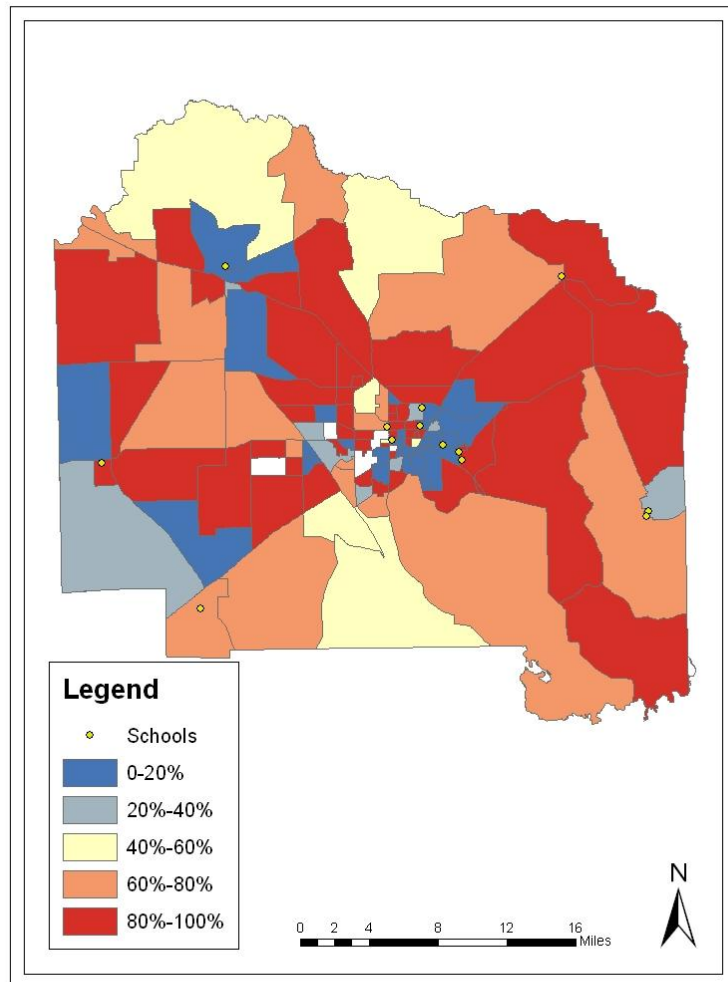

# Females Without High School Diploma

- Females without high school diplomas are spread out just like males.
- Both city and rural schools draw from areas with at least 60% without a high school degree.

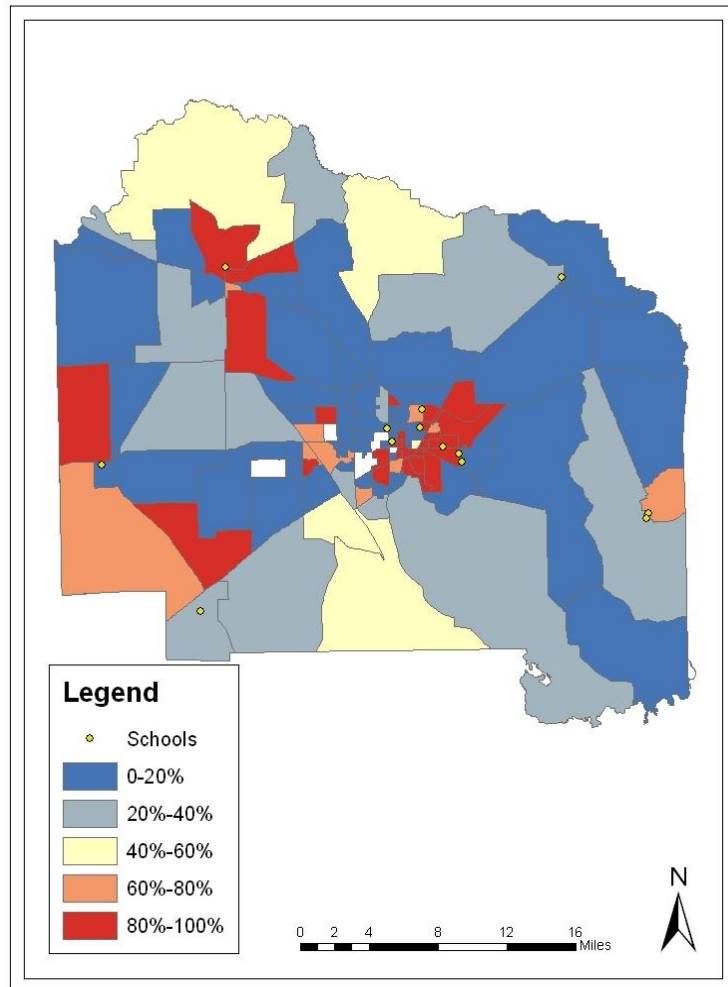

# Whites Without High School Diploma

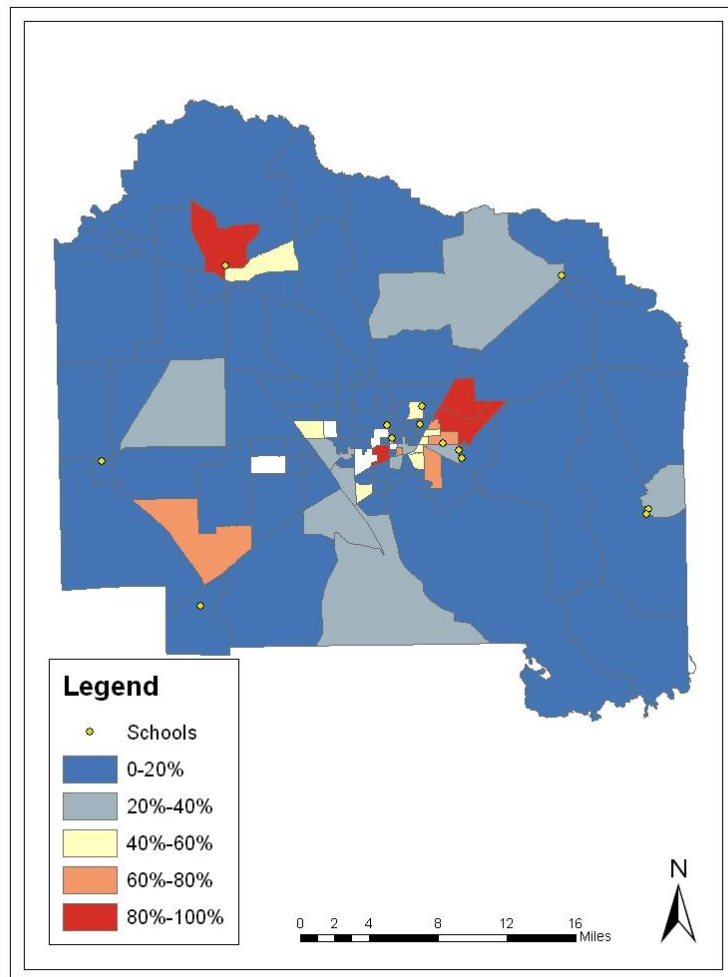

- Large number of block groups with 60% or more without high school diploma.
- Alachua has small percent without high school degree.

# Blacks Without High School Diploma

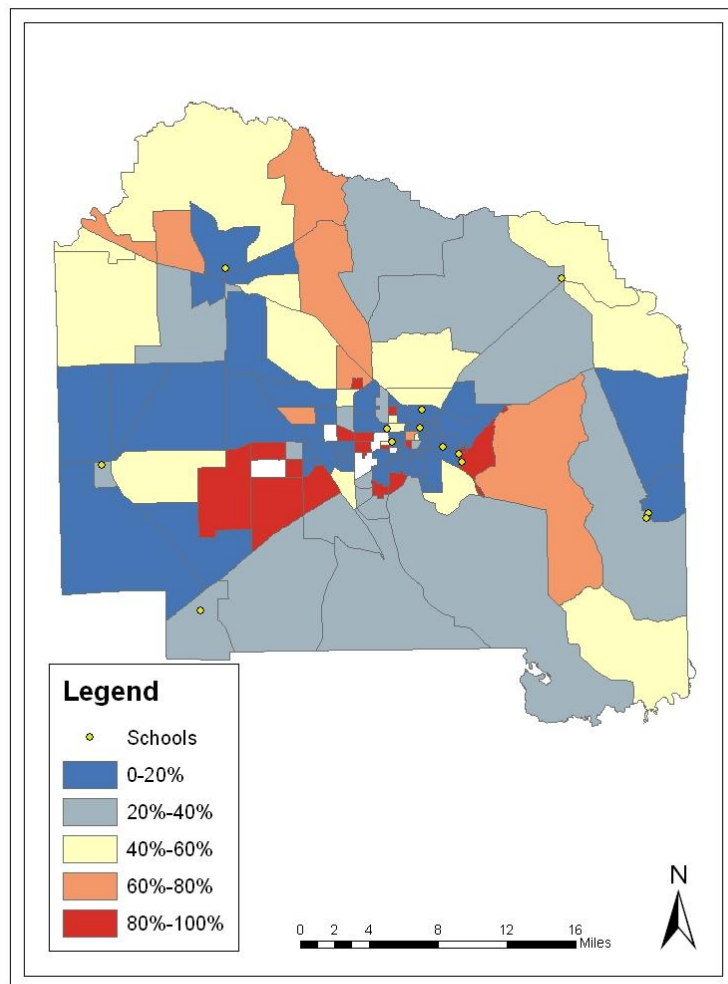

- A large number of block groups contain 40% or less without a high school degree.
- The majority of 80% and more are located in the central and east parts of Gainesville, as well as parts of Newberry and Alachua.

# Black Males Without High School Diploma

- Majority of black males without high school degree is located around Gainesville and Alachua.
- Majority of rural areas have a population less than 40%.

# White Females Without High School Diploma

- This population is very scattered.
- There are a few block groups in Gainesville with 80% or more without degree.
- There are also rural areas with 60% or more without degree.

# Statistics

- Slightly more males (51%) do not have a high school degree.
- Whites (44%) and blacks (55%) make up the majority without a high school degree.
- Black males (34%) and white females (27%) are the highest percent of people without a high school degree.

	Males	Females	Whites	Blacks	Hispanic	Asians	WM	WF	BM	BF	HM	HF	AM	AF	Total
Total	288556	275044	247121	309783	3438	3258	96844	150277	190620	119163	995	2443	97	3161	563600
Percentage	51.20%	48.80%	43.85%	54.97%	0.61%	0.58%	17.18%	26.66%	33.82%	21.14%	0.18%	0.43%	0.02%	0.56%	100

# What Contributes to a Bad Education?

- Low test scores
  - Florida Writes- 92% of the district and state scored 3 or better.
  - FCAT Math- State objective is for 62% of the students to score 3 or better.
  - FCAT Reading- State objective is for 58% of the students to score 3 or better.
- Graduation and drop out rates (High school only)
  - 69.8% of the state graduated.
  - 2.4% drop out of school.

# Inadequate Schools

- Fell below two of the three standards.
  - Lake Forest Elementary
  - Metcalfe Elementary
  - Rawlings Elementary
  - Shell Elementary
  - Archer Community Center
  - Waldo Community School
  - Mebane Middle
  - Hawthorne Jr/Sr High
  - Eastside High
  - Gainesville High
  - Newberry High
  - A. Quinn Jones Center\*
  - Loften High\*

# State Test Scores

- Rural schools had lower test scores overall.
- Hawthorne was the worst overall.
- ■ - Within 5% of being acceptable.
- ■ - Over 5% from being acceptable.

	Writing_Wh	Writing_Bk	Writing_DisAd	Writing_Tot	Math_Wh	Math_Bk	Math_DisAd	Math_Tot	Reading_Wh	Reading_Bk	Reading_DisAd	Reading_Tot
Eastside	98	84	82	90	93	44	46	64	89	15	19	44

State	94	90	89	92	62	62	62	62	58	58	58	58

# Graduation/Drop Out

□ Rural schools did much worse at graduation rates.

□ Drop out rates were mixed with Hawthorne being the worst.

School	Grad_Male	Grad_Female	Grad_Wh	Grad_Bk	Grad_DisAd	Grad_Total	Drop_Male	Drop_Female	Drop_Wh	Drop_Bk	Drop_Total
Eastside	57.0%	62.6%	77.0%	46.6%	40.2%	60.5%	7.9%	7.1%	4.5%	9.8%	7.5%
Gainesville	57.7%	61.7%	70.3%	47.3%	45.9%	59.6%	6.5%	5.0%	4.3%	7.9%	5.7%

Buchholz	68.3%	71.5%	78.9%	40.5%	42.7%	69.9%	4.5%	4.1%	3.2%	6.8%	4.3%
Santa Fe	67.1%	74.4%	73.9%	57.4%	56.6%	70.8%	6.1%	3.7%	4.8%	4.4%	4.9%
State	65.8%	73.9%	78.9%	54.6%	56.0%	69.8%	3.7%	2.9%	2.4%	4.7%	3.3%

# High School Grad vs. Non Grad

- Average annual salary
  - \$30,400 (1999)
- Average lifetime income
  - \$994,080  
(40 year career)

- Average annual salary
  - \$23,400 (1999)
- Average lifetime income
  - \$630,000  
(40 year career)

\$364,080 more in lifetime than non grad. 58% increase in income for having a diploma.

# What Can You Do With \$364,000?

- Buy a home. (Average Gainesville home-\$160,000)
- Buy a car. (2008 Toyota Camry ~ \$18,775)
- Trip to Disney. (3 day stay for family of 4 ~ \$2,700)
- Buy a computer. (24-inch iMac ~ \$2,200)
- Still have \$180,325. Enough to buy another home or yearly trips to Disney.

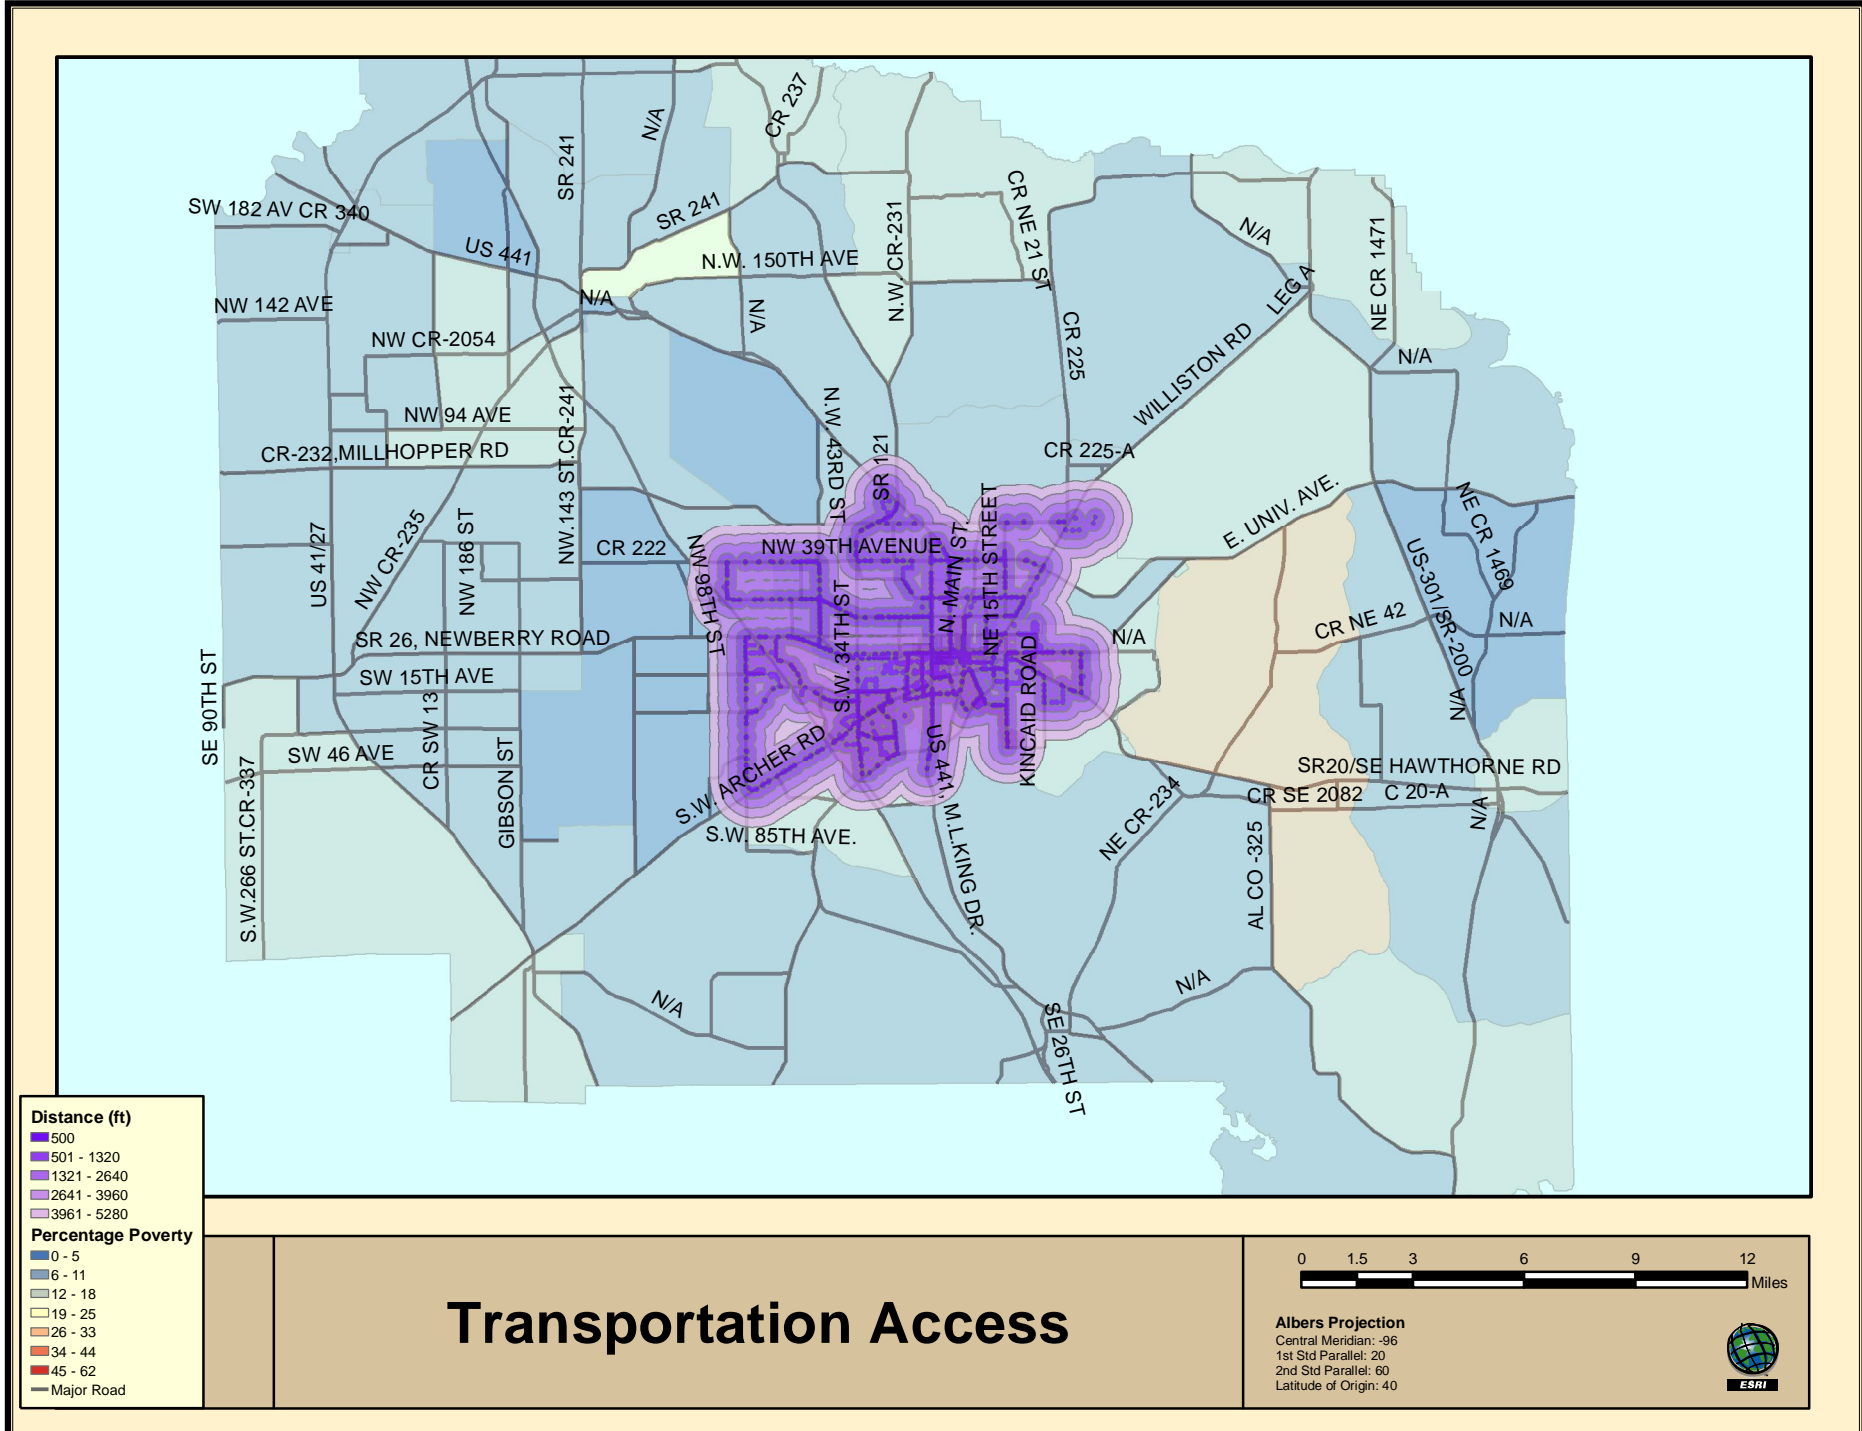

# Possible Education Goals & Incentives

- Have the county meet or exceed state standards or averages.
- Alachua County School Board could set up after school tutoring at local community centers and churches.
  - Have enrolled UF and SFC students volunteer to lead these groups.
- Set disciplinary measures for students who drop out or don't graduate. (Suspended driver's license).
- Pay students for excellent test scores.

# Transportation Services

- Routes are essential if they provide transportation to key locations
- Necessary for movement up social class,
- Differences between transportation for rural vs urban poor
- It becomes increasingly inconvenient, unfeasible if more time is spent walking to the bus stop than actual travel.

# Urban Transportation Access

Albers Projection  
 Central Meridian: -96  
 1st Std Parallel: 20  
 2nd Std Parallel: 60  
 Latitude of Origin: 40

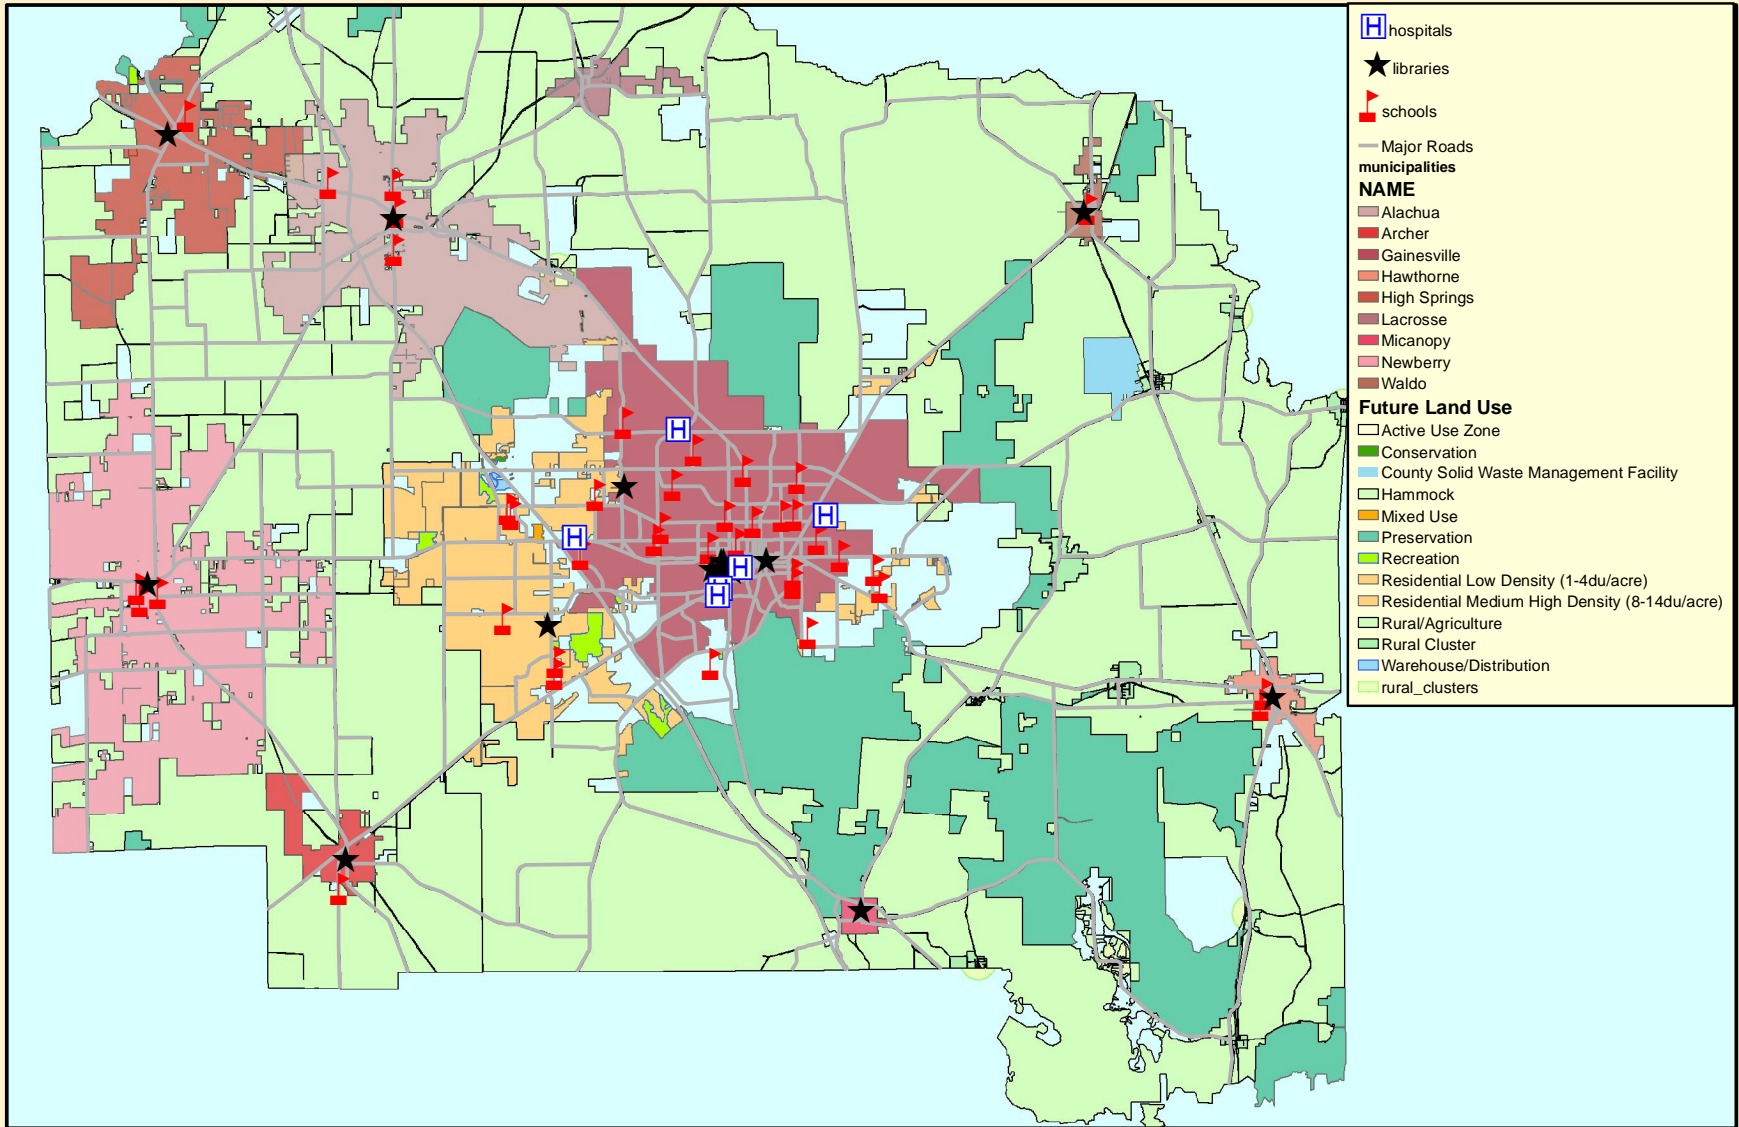

# Urban Transportation Access

- Points of Interest: Human Resource Services (City, County, State, Hospitals), Schools, Shopping Centers, Parks and Recreation,
- Accessibility: High volume of riders balanced by number of routes, connections, frequency of buses
- Special services: Paratransit Service, Weekend, Holiday

# Access to Public Services

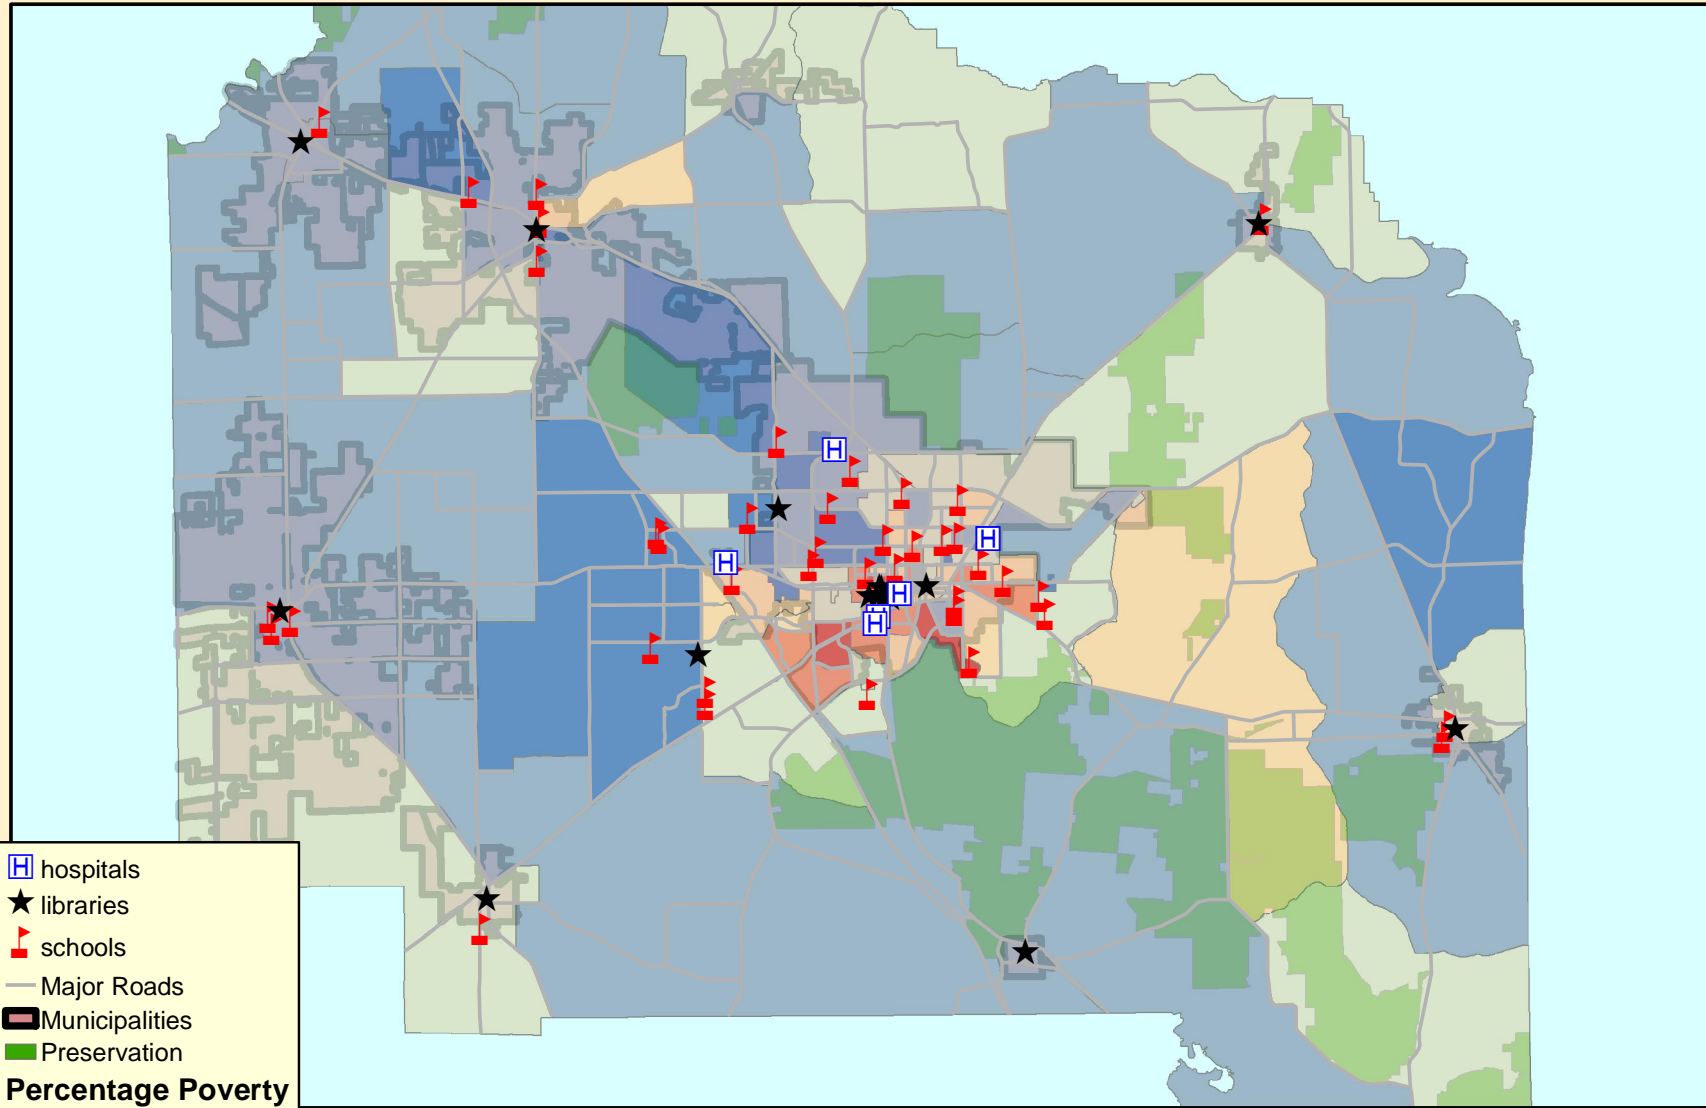

Albers Projection  
 Central Meridian: -96  
 1st Std Parallel: 20  
 2nd Std Parallel: 60  
 Latitude of Origin: 40

# Public Service Access

- Amount per block sharing, distance to service.
- Hospitals, provide health, maintenance of sustainable living condition
- Schools provide education for movement through social/economic classes
- Libraries provide additional educational value

- hospitals
- libraries
- schools
- Major Roads
- Municipalities
- Preservation
- Percentage Poverty**
- 0 - 5

# Rural Public Services

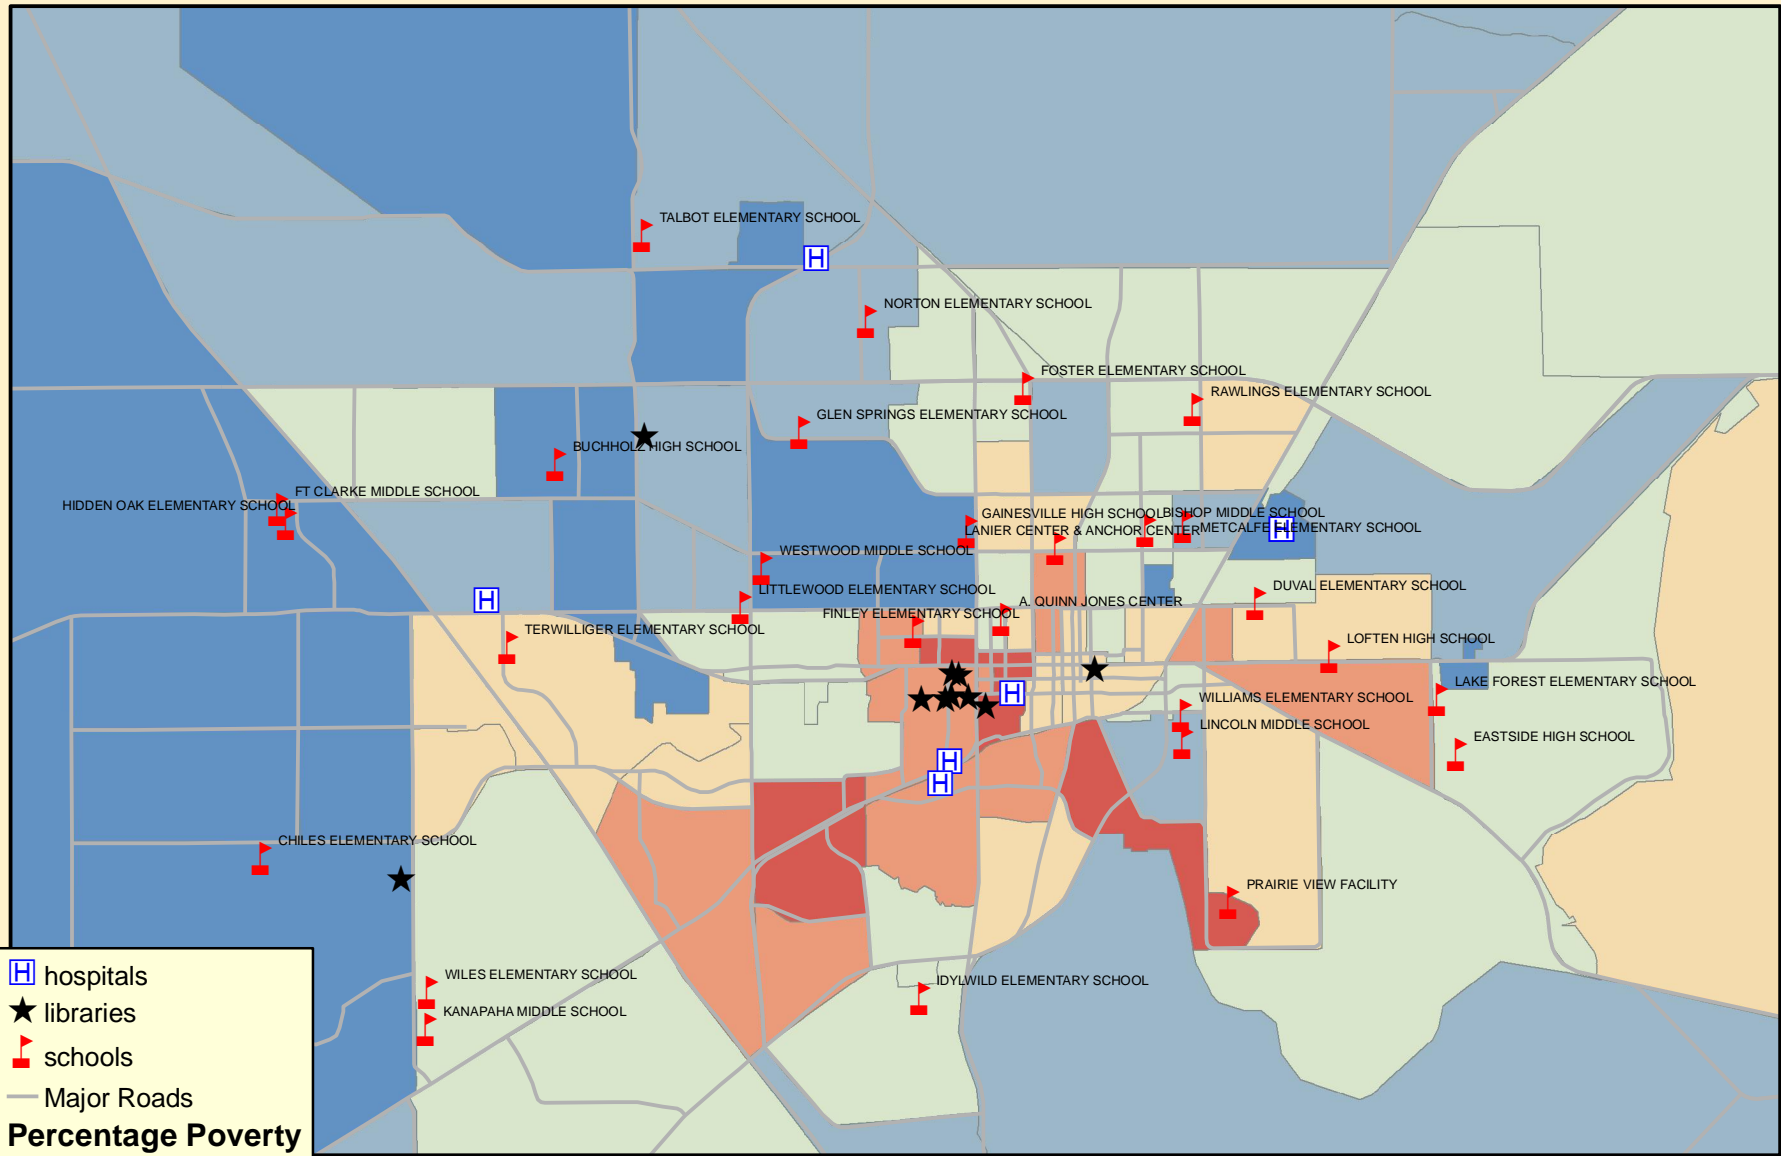

Albers Projection  
 Central Meridian: -96  
 1st Std Parallel: 20  
 2nd Std Parallel: 60  
 Latitude of Origin: 40

# Rural Public Service Access

- Hospitals- Must travel to Gainesville for Hospital Care or rely on ambulance
  - ▣ Possible reasons for lack of hospital: difficult to attract physicians, public programs pay lower than private insurers, few opportunities to perform economically enhancing procedures
- Libraries- underfunded, located in municipalities
- Schools- No public transportation other than school bus. High schools only in municipalities, often few or combined school. Middle schools, elementary schools also combined, few choices.

# Urban Public Services

**Albers Projection**  
 Central Meridian: -96  
 1st Std Parallel: 20  
 2nd Std Parallel: 60  
 Latitude of Origin: 40

# Urban Public Services

- Hospitals-Public transportation routes available to 6 hospitals and 7 other health care facilities
- Libraries- At least 10 libraries available in urban poverty range
- Schools- 5 high schools on transit route, 4 middle schools on transit route, 12 elementary schools on transit routes

# Goals for Transportation and Public Services

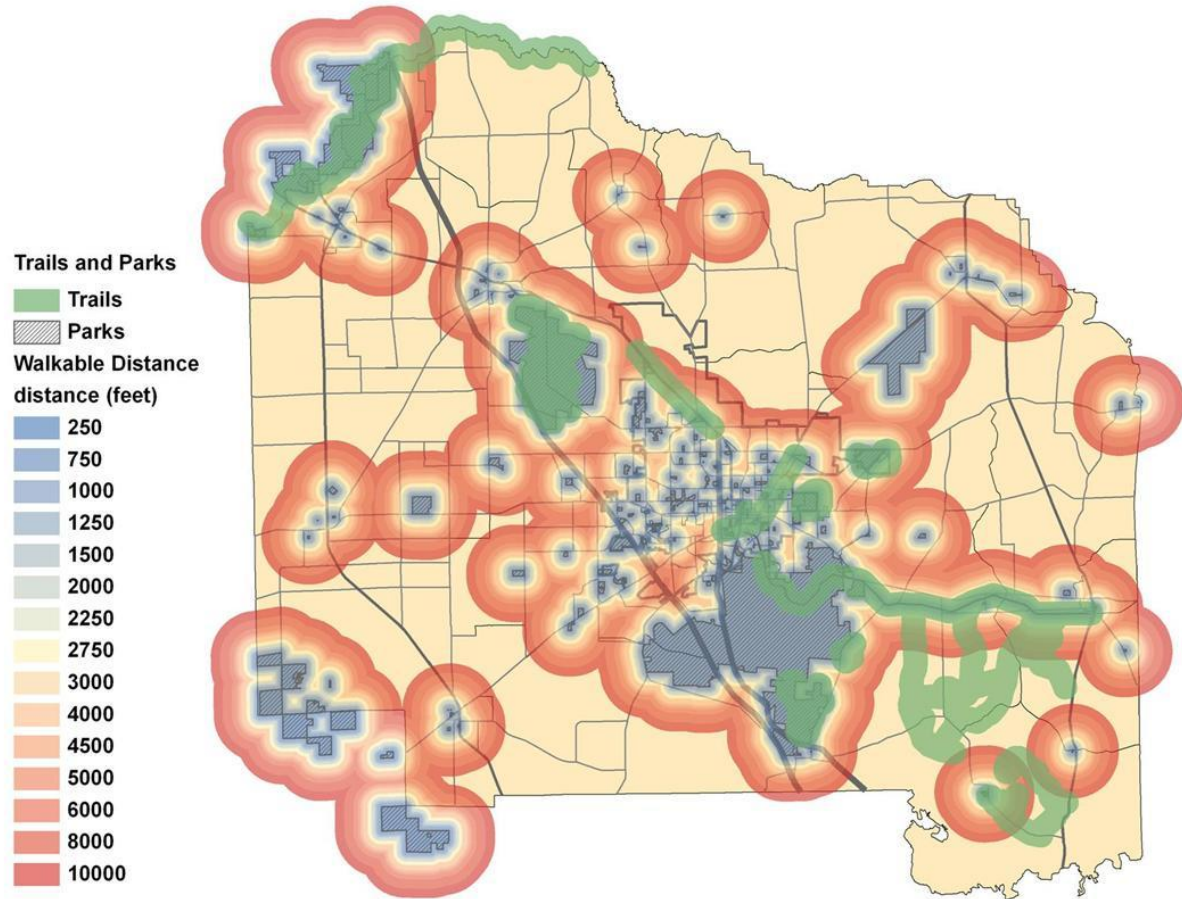

- Increase transportation services in rural poverty locations: Cost efficient, urban poverty reduction, reduce social and economic inequality
- Greater connectedness with surrounding counties, Railways, Federal Transit Act
- Greater public service resources increases quality, expansion of government health insurance

# Trails and Parks

- Activity and community
- catalysts for community revitalization

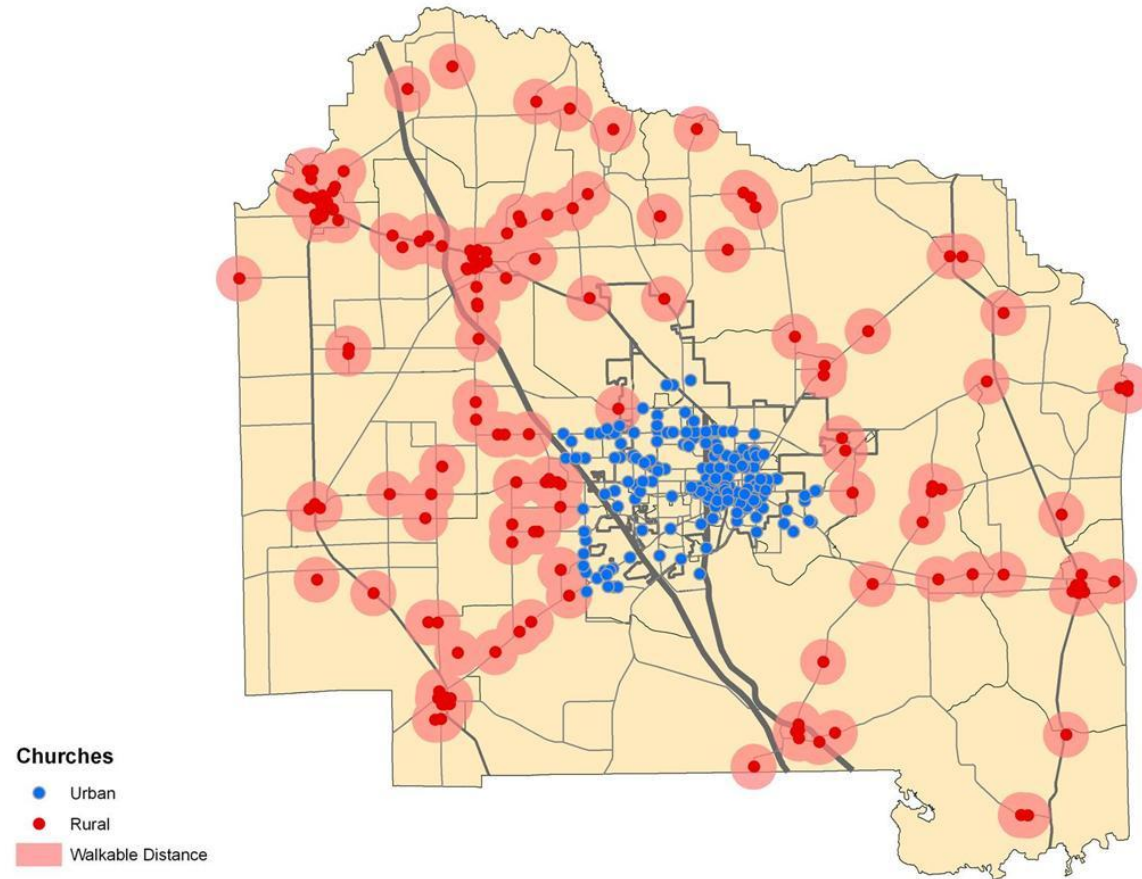

# Urban Parks

- Proximity to neighborhoods
- Higher property values

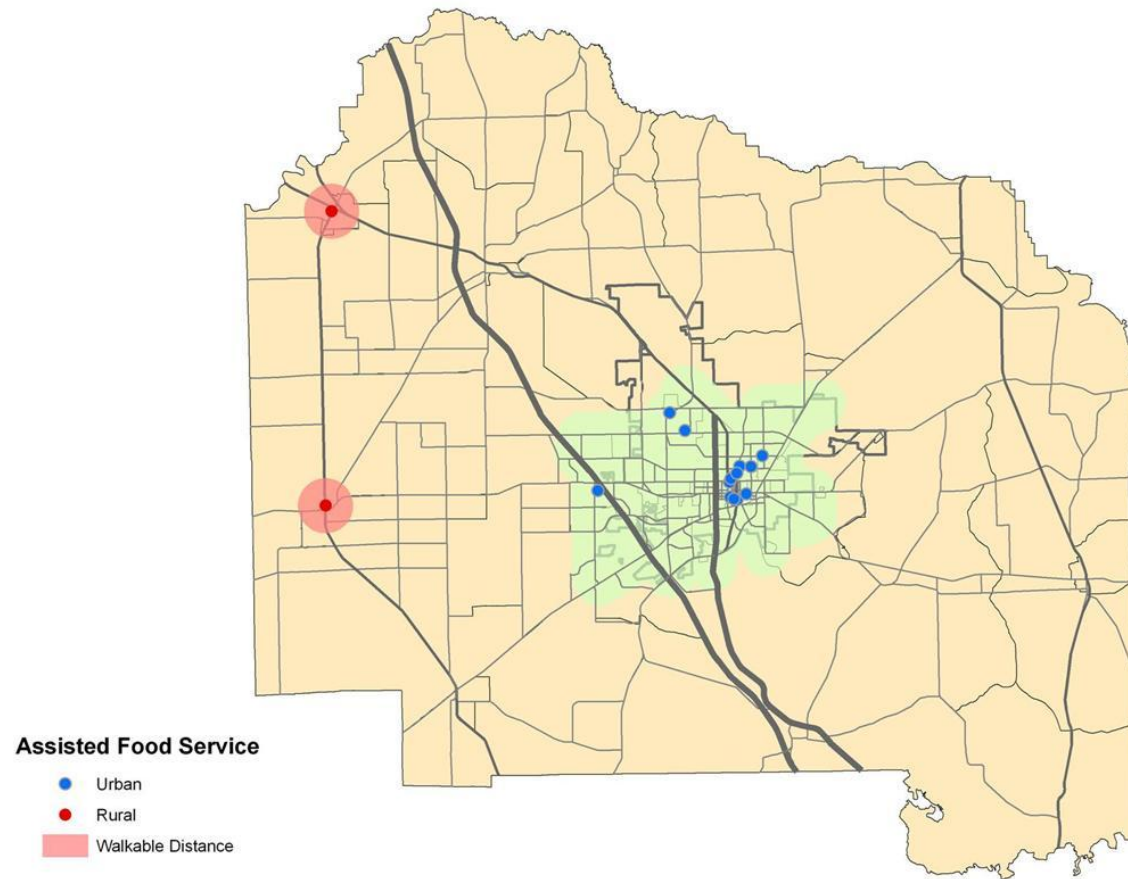

# Community Involvement

- Religious service and worship
- Network opportunities
- Spiritual atmosphere

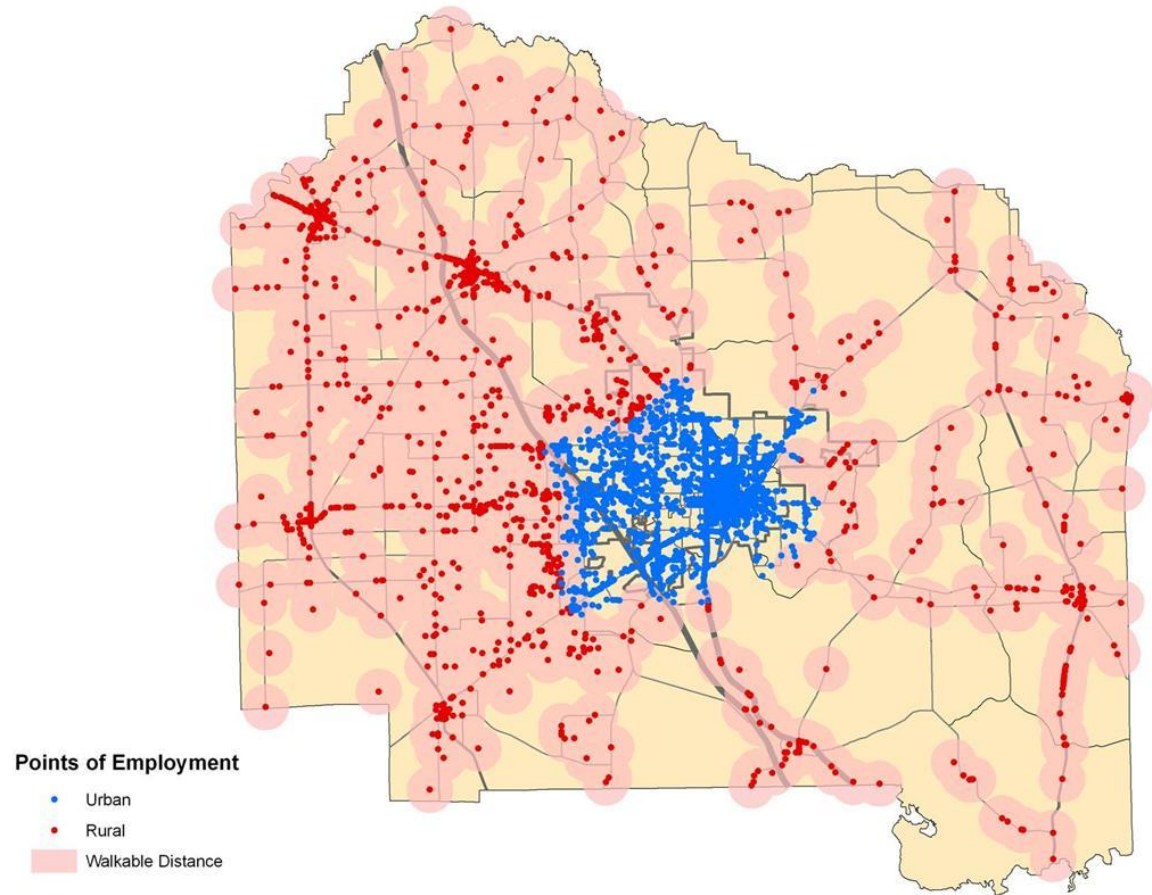

# Community Involvement

- Food access
- Community Service

# Points of Employment

- Points within RTS boundary (Urban area)
- Ease of access; walkable distances in the Rural areas

# Goals

## Churches:

- Attract more people to religious services
- Distribute resources to the needy

## Community Centers:

- Provide more places for the poor to have essential goods and services.

## Parks:

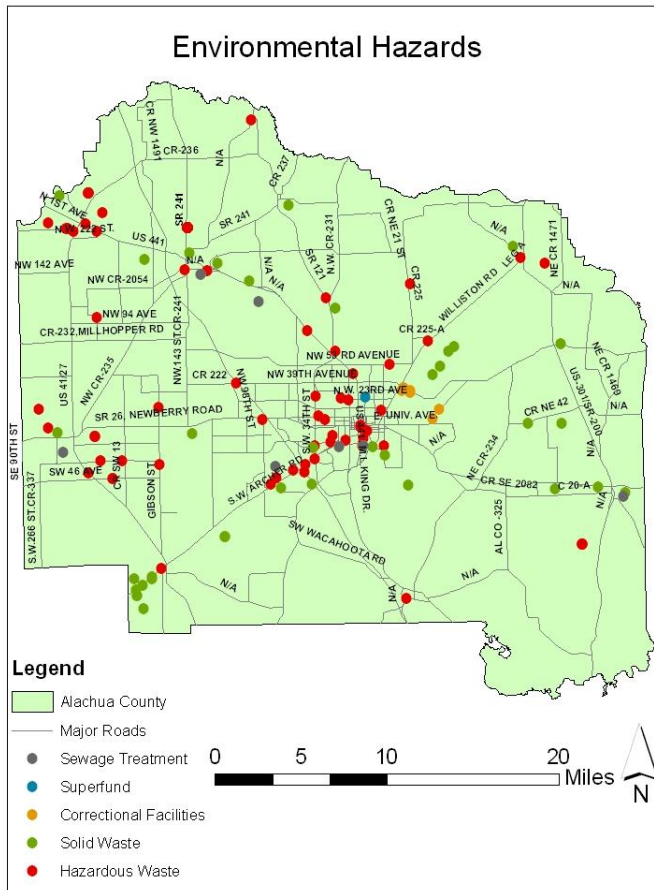

- Increase the number of parks per area.
- Design of parks – an important resource for people.
- Revitalize more parks

# Environmental Hazards

- Locations in Alachua County that may pose a threat to people's health
- Can also have negative effect on perception of area
- Solid Waste, Hazardous Waste, Superfund,...
- Where they are in relation to the poor

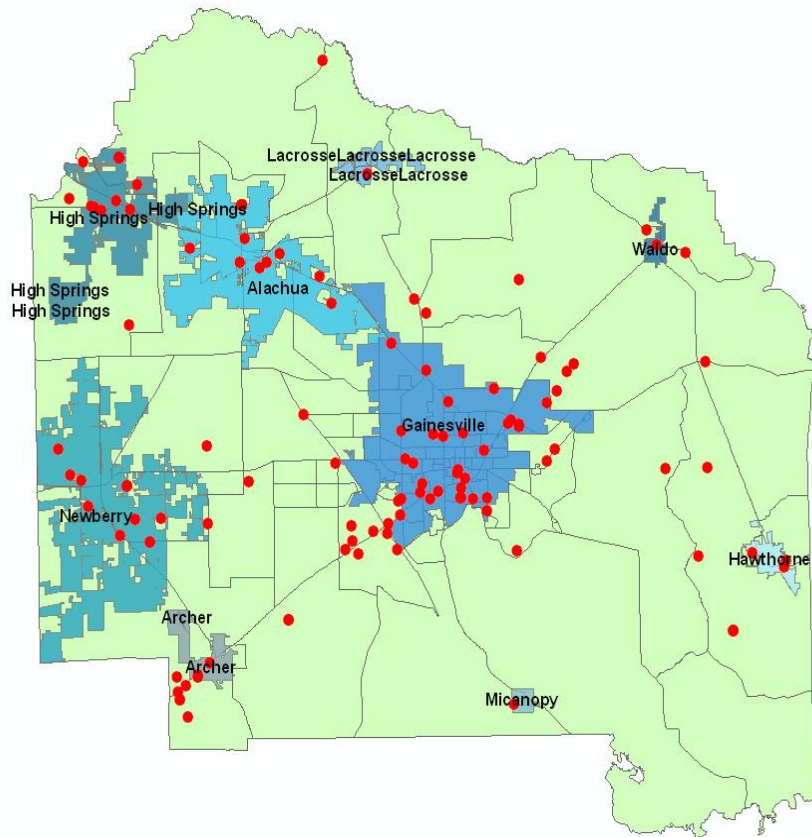

# Environmental Hazards

- All hazardous sites in the county over major roads

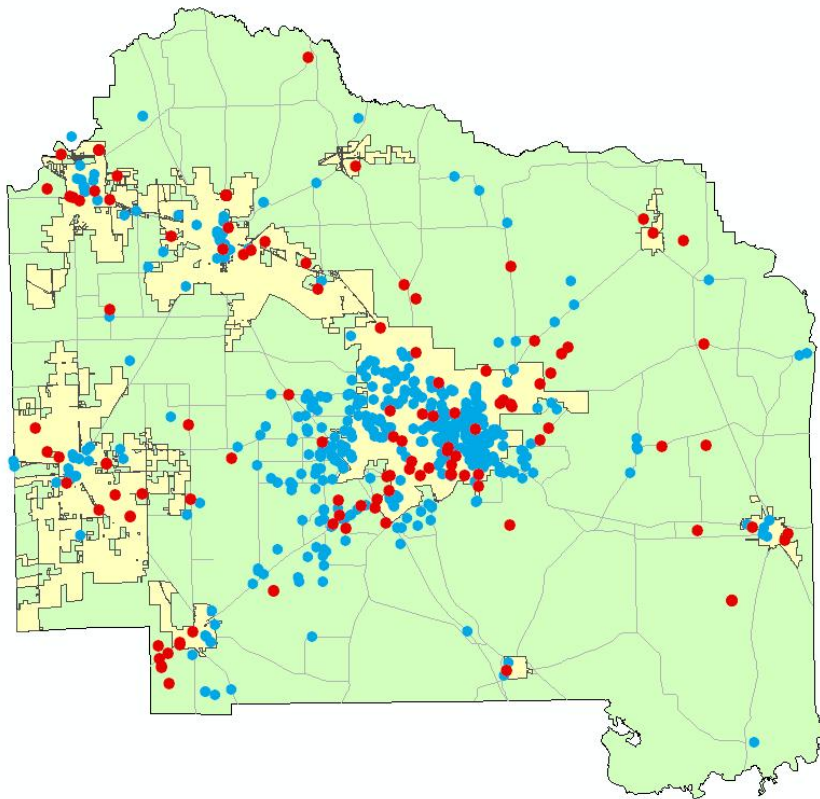

# Municipalities

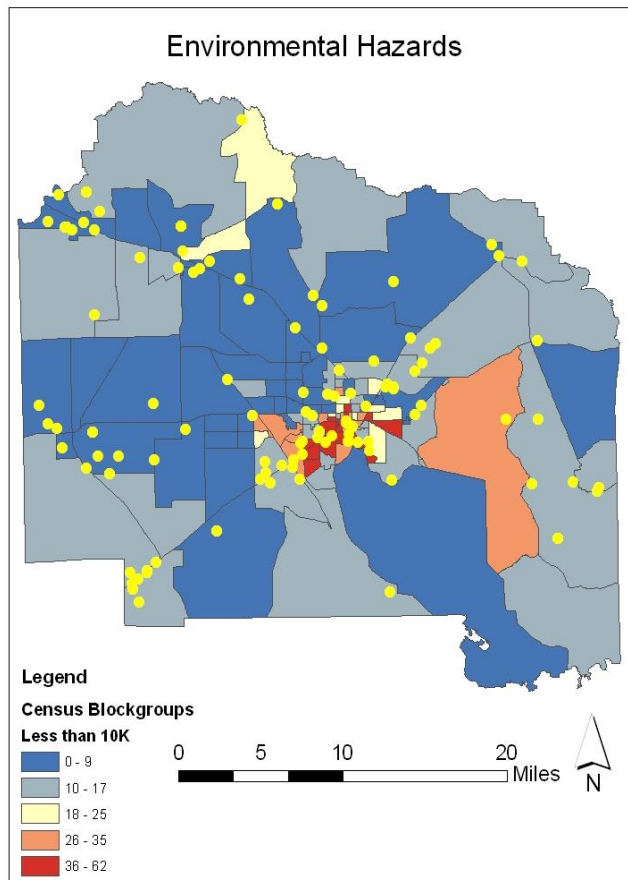

- The distribution of environmental hazards in all of Alachua County's municipalities
- Most are located in Gainesville and other urban areas

# Hazards & Poverty

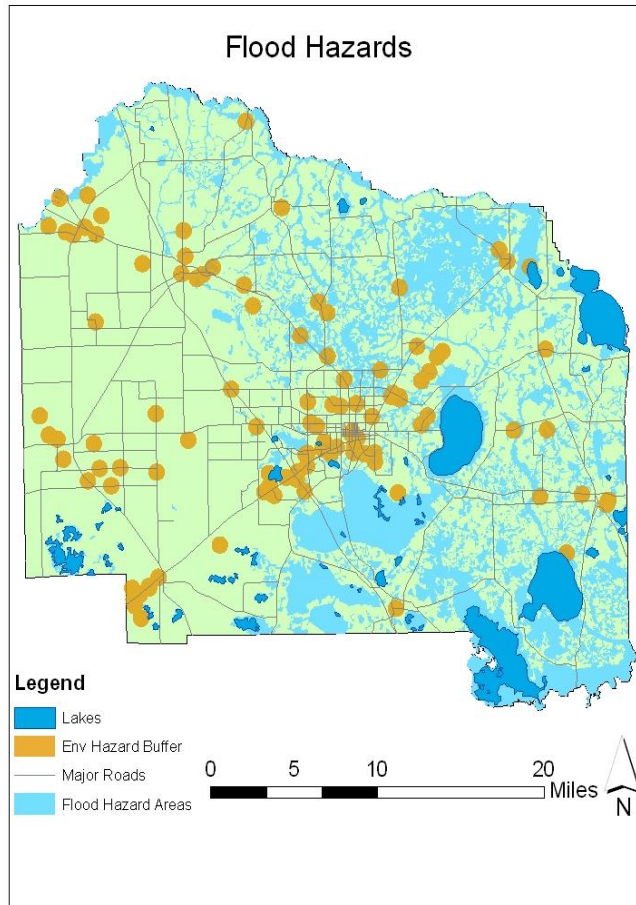

- All environmental hazards shown in red
- Blue areas represent Assisted Food Services, Assisted Rental Housing, Group Homes and Group Care

# Block Groups

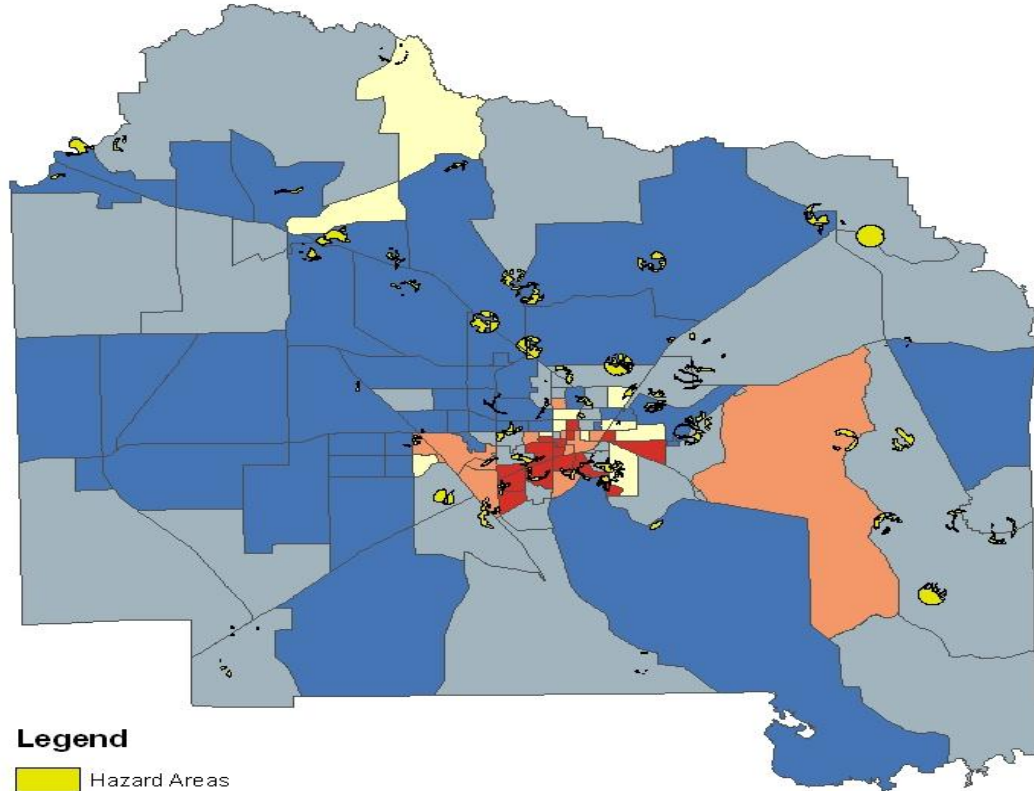

- Census Block Groups by Percentage earning less than \$10,000 and all environmental hazards
- Many hazards are located near or in poorest block groups in Gainesville

# Flood Hazards

- All Flood Hazard areas represented in light blue
- Half mile buffers around environmental hazards in orange

# Gainesville Area

# Urban & Rural Poverty

- In Alachua County, most environmental hazards are located in urban areas
- The poorer census blocks in south and southeast Gainesville have many hazard sites
- Although rural areas have fewer hazards, they are further away from useful services, especially hospitals

# Environmental Equity

## U.S Environmental Protection Agency:

- Environmental equity refers to the distribution of environmental risks across population groups
- Racial minority and low-income populations experience higher than average exposures to selected air pollutants, hazardous waste facilities, contaminated fish and agricultural pesticides

# Environmental Equity

- Hazardous sites should be equally distributed among income and racial groups
- More data should be collected routinely to assess the health of people near these sites
- Local communities should be more involved in decision making

# Conclusion

- Alachua County School Board could set up after school tutoring at local community centers and churches.
  - ▣ Have enrolled UF and SFC students volunteer to lead these groups.
- Encourage community involvement - Increase the number of services and places for activity (parks, churches,...)
- Increase transportation services in rural poverty locations: Cost efficient, urban poverty reduction, reduce social and economic inequality
- Hazardous sites should be equally distributed among income and racial groups
