Weekly Report 6

This week I became a bit sick, however I was able to create a Wii Remote test app. I also purchased an Arduino kit for playing wav files off of an SD card. The kit allows for 22 kHz 12 bit mono audio files to be played through an atmega328. The code and design were not mine; I just plan to take advantage of the easy interface. The arduino will receive uart data from the main micro, to determine what should be played and when.
