

SOME TESTIMONIALS FROM A PAID ACADEMY OF FINANCE INTERNSHIP OR JOB FROM SUMMER OF 2007

Working as a bank teller at MCT Federal Credit Union introduced me to the world of finance with cash handling, customer service, and computer transactions. Finding new aspects of financial planning and procedures is a skill that I will keep when working as an accountant in the future. The AOF is a great program with possibilities to guarantee success.

Nive Lindeire

The AOF helped me with writing an effective resume and with interviewing skills. The Academy also provided opportunities for me to get an internship and as a result, I have learned how the work force functions.

Lloyd Dallas

As a bank teller, I learned the importance of service. If I had a positive attitude toward members or customers, then the members/customers would have a positive attitude toward me.

Lillian Tran

At Lexus, I learned to act in a professional manner, because you are dealing with people with various types of conflicts. I learned how the accounting process operates within the dealership and how each person has a different part in the process. This internship helped me figure out what I might want to do with my life.

Jennifer Homhouane

I learned how to use different software programs related to accounting and finance. Learning about the business setting and how people assist each other. This experience affirmed what I want to do in the future as a financial planner.

Michael Lutz

I learned to be productive, manage my time, customer service, and how to work with people. Also I learned about working with older more experienced people and working as a part of a team.

Patrice King

During the internship, I got to experience the real business world. Dressing up, working eight hours a day, and acting in a professional manner are things I won't forget. Attending meetings, preparing for meetings, being responsible, time management, and having a hand-on-approach to work was a real benefit.

Brian Kaye

I learned that being on time to work was a top priority. Also, appropriate attire was expected. Some duties were more important than others. Listening to and respecting my immediate supervisor was absolutely essential.
