| LIST OF TABLES                               | vii  |
| LIST OF FIGURES                              | viii |
| ABSTRACT                                    | ix   |

CHAPTER

1 INTRODUCTION 1

The Problematic Situation 1
Research Area 2
Objectives 3
Hypothesis 4
Framework 5
Methods 6
Organization of the Study 7
Expected Outcomes 8
Relevance 9

2 NITROGEN POLLUTION IN THE SRWMD 1

Evidences of Nitrogen increase in the SRWMD 1
Hard Data of Historical Measurements 2
The Suwannee River Partnership 3
Best Management Practices 4
Regulation of Dairy Farm Operations 5
Non-Point and Point Source Pollution 6
Conclusions and Recommendations 7

3 NORTH FLORIDA DAIRY FARM SYSTEMS AND NITROGEN POLLUTION 1

Description of North Florida Dairy Farm Systems 1
Waste Management Systems in Dairies 2
The Nitrogen Flow in Dairy Systems 3
Nitrogen budgeting in Dairy Farm Systems

4 PERCEPTIONS AND ATTITUDES OF NORTH FLORIDA
STAKEHOLDERS TOWARDS THE NITROGEN ISSUE 1

Narrative of Stakeholder Meetings and Interactions 1
Sondeo of Stakeholders’ Perceptions 2
Interviews of Dairy Farmers and Other Stakeholders 3

5 NORTH FLORIDA CLIMATE PATTERNS AND ITS POTENTIAL
CONSEQUENCES IN DAIRY FARM SYSTEMS AND NITROGEN
LEACHING 1

Climate Patterns in North Florida 1
Herd Performance Related to Climate Variables 2
Crop Performance Related to Climate Variables 3
Climate Patterns and Nitrogen Leaching 4
Climate and Economic Flow of North Florida Dairy Farm Systems 5

6 INTEGRAL PARTICIPATORY NORTH FLORIDA DAIRY FARM
SIMULATION MODEL 1

Dynamic North Florida Model 1
Driver Controller Model 2
Linear Programming Decision Making Models 3
Crop Models 4
Model Validation and Integral Simulation 5
Model Assumptions 6

7 ECONOMIC IMPACTS OF STRATEGIES TO DECREASE
NITROGEN LOST IN NORTH FLORIDA DAIRY FARM SYSTEMS 1

Potential Management Strategies that North Florida Dairy Farmers may Test 1
Environmental Cost or Cost of Compliance of Dairy Farms 2
Limitations of Results and Further Research 4

8 CONCLUSIONS AND RECOMMENDATIONS

Conclusions 1
Recommendations 2
Significance 3
Committee Members

Peter E. Hildebrand, Chair, Food and Resource Economics
James W. Jones, Agricultural and Biological Engineering
Robert McSorley, Entomology and Nematology
Hugh L. Popenoe, Soil and Water Science
Albert de Vries, Animal Science
